Experiment 1(a): Amazon Free Tier Account Creation

Aim

To create an AWS account, complete the verification process, and access the AWS Management Console.

Requirements

1. A valid email ID.
2. A mobile number for OTP verification.
3. Personal details such as name and address.
4. An internet connection.
5. A debit card, credit card, or UPI for payment verification, if required.
6. An identity document such as Aadhaar, PAN, voter ID, or driving licence, if requested.

Procedure

1. Open a web browser and visit https://aws.amazon.com/free.
2. Click on **Sign in to console**.
3. Select **Create a new AWS account**.
4. Enter your email address, password, and AWS account name.
5. Verify your email address by entering the OTP sent to your email.
6. Select the available Free plan and continue with the registration.
7. Enter your personal details, including your full name, mobile number, and address. Accept the terms and continue.
8. Provide the required billing information using an accepted payment method, such as a debit card, credit card, or UPI.
9. Complete identity verification by selecting the required account details and providing an accepted identity document, if requested.
10. Enter your mobile number and verify it using the OTP received through SMS.
11. Wait for AWS to complete the account setup process.
12. Open https://console.aws.amazon.com and sign in using your registered credentials.
13. After successful login, the AWS Management Console dashboard will appear.

Verification

1. The AWS Management Console dashboard is visible.
2. The AWS account name is displayed in the account menu.
3. The account plan and status can be checked.
4. The available AWS services can be accessed according to the selected plan.

Result

An AWS account was successfully created and verified, and access to the AWS Management Console was obtained.
